

## **BIM-MEP<sup>AUS</sup> Revit Template – April 2022 Update**

---

The BIM-MEP<sup>AUS</sup> Revit Template has been improved with the following updates:

- PVC-U pipe type has been added.
- Renamed some duct systems and families to improve consistency.
- The standard angle of Transitions is now set to 30°.
- A graphical issue with insulated pipe fittings has been fixed.
- An issue with the cable tray fitting has been corrected.
- The schedule filters have been updated to ensure only generic families and product types are loaded into the "Design" schedules and only manufacturer specific families and product types are loaded in the "Procurement" schedules.
- The Share Parameter file has been updated to V7.
